MILWAUKEE COUNTY EMS MEDICAL PROTOCOL ASTHMA/COPD

Approved by: M. Riccardo Colella, DO, MPH, FACEP WI EMS Approval Date: 2/15/12 Page 1 of 1

History	Signs/Symptoms	Working Assessment
May have a history of asthma	Chest tightness	Asthma
Exposure to irritant	Dyspnea	
Recent URI	Coughing or wheezing	
	Accessory muscle use	
History of COPD	Chronic cough	COPD
	Dyspnea	
	Pursed lip breathing	
	Prolonged exhalation	
	Barrel chest	
	Clubbing of fingers	

Notes:

- The optimal pulse oximetry level for the patient with a history of COPD is 88 92%.
- If an asthmatic has no improvement after 2 doses of EMS administered albuterol/ipratropium therapy, consider medical consultation for an *order* for intramuscular epinephrine.
- Patient's self-treatment does not limit EMS provider's albuterol/ipratropium dosing.
- CPAP should not preclude standard medication administration.
